

MATERIAL SAFETY DATA SHEET

1. **Product :**

Ziplock bags.

2. **Composition :**

Thermo welded bags made of 100% virgin low-density polyethylene film (LDPE) blank suitable for food contact.

- Bags comply with European Directive 2011/10/EC of 14th January 2011 on materials and articles intended to come into contact with foodstuffs, modified by the European Directive 2016/1416 of 24th August 2016 and lately modified by the European Directive 2019/1338 of 8th August 2019.

Bags conform to REACH - our bags do not contain any of the substances listed on the SVHC list updated January 16th, 2020

3. **Safety Data and general precautions:**

General

We are not aware of any undue risk to health in normal use, handling and storage.

Fire

Plastic products are combustible. It is therefore necessary to avoid sources of ignition during use, handling and storage.

Water fire extinguishers, foam, dry powder or snow can be used for the fight against fire.

The burning of plastic films causes excess heat and toxic vapor. A mask or respirator should be worn.

Treatment

Normal safety precautions and hygienic practices in the industry should be observed during treatment.

This product is not normally intended to be applied on the skin.

Waste disposal

Proceed according to the approved methods.
